

To whom it may concern,

Our company, Blackbaud Pacific, went into a design and construct tender and Kai (Aspace Design) was asked by the Project Management team to come up with the design concept for our new office space at Level 2, 65 Berry St, North Sydney in April 2015.

Our decision to go with this particular team was due to the design concept created by Kai and the interesting layout that Kai came up with in a very challenging space. It was her ability to add a level of design flair and sophistication that made this office a unique environment for our staff as well as having the ability to work to a very tight budget yet still come up with a space that met the brief. Her work, particularly across many creative and marketing agencies, was of particular interest as it was most similar to the level of response we were looking for at the time.

Whilst working with Kai to develop the concept, she showed an immense level of intensity toward the project whilst being very open to our ideas and input on the design. During the course of the project, Kai worked closely with the builder, project manager and contractors. She is not only a good designer but also a joy to work with.

I am pleased to have worked with Kai and highly recommend her as a highly professional designer.

Yours Sincerely,

Jenny Bloch
Office Manager
